FINANCE.

The Board again desire to call attention to the diminution of income in late years. The amount now received as the Board's share in the Local Taxation (Ireland) Account is £46,566, as compared with £71,400 in 1900, a diminution of £24,834.

At the same time the number of students entering for the Board's examinations has steadily increased. In 1900 the number was 8,287, in 1912 it was 13,858. Thus, while the number of pupils in the schools with whom the Board are concerned has increased by more than 50 per cent., and notwithstanding the fact that the expense of an inspection system has been added to the responsibilities of the Board, the income with which to meet these increasing claims has suffered a very serious diminution.

The Board are strongly of opinion that more money is urgently needed. The money allotted at present for distribution is totally inadequate to relieve the schools from the financial difficulties under which many of them are struggling. An additional grant, to be paid on inspection of the upper classes in the schools, would do incalculable good educationally. Additional money, too, is needed for holiday courses for teachers, and for organisers in certain districts where the teachers would not be able to avail themselves of such courses. Since inspection began there has been a steady advance in the treatment of the oral side of the language work, but this advance would be far more rapid if the teachers had better opportunities for acquiring a knowledge of phonetics, a correct pronunciation, and a grasp of oral method. There is a strong demand in the country for such facilities.

NEW ACT.

In August, 1913, an Act dealing with Intermediate Education was passed, empowering the Board to pay fees to managers of schools dependent on the results of inspection of pupils under the age of fourteen, and not under the age of twelve years. It was not possible to apply the provisions of this Act to the school year 1912-13; but rules in accordance with it have been drawn up for the year 1913-14.

In the meantime the reports of the inspectors show that the abolition of the Preparatory Grade written examinations, which imposed too great a strain on young students, and the extension of inspection to pupils younger than those who were included in the old Preparatory Grade have borne good fruit. It is now possible for schools to frame a curriculum to suit the capacity and requirements of the students. Weak students are now enabled to lay a good foundation, whereas formerly they were often rushed through the work at too fast a pace to enable them to digest thoroughly the knowledge imparted to them. Capable students are no longer confined within the limits of the old Preparatory

Course. The schools have on the whole used their autonomy with judgment and discretion. As they have been free from the influence of a rigid examination, they have been able to carry out the suggestions of the inspectors in a more efficacious way than was possible before the abolition of the examination.

INSPECTION AND EXAMINATIONS.

The reports of the inspectors show that the steady and regular development in the methods of teaching, mentioned in previous reports, still continues.

The Board again repeat their opinion that it is desirable to adopt a system whereby examination and inspection would serve as complements to one another, and would each have a share in determining the school grant in the higher classes. This might be done in such a way that while the advantages of an examination system would be secured its disadvantages would be minimised. At present the fact that the schools suffer financially, if they do not concentrate almost entirely on preparation for the public written examination, is naturally injurious from an educational point of view. Many schools that at present do good work which cannot be tested by a written examination receive no financial advantage from that work. By the adoption of the system mentioned above, while the incentive of a written examination would be retained for students who might not otherwise work so well, points of education which play an important part in school life and which cannot well come within the scope of a written test, would receive due recognition. The teacher whose methods are sound often finds his good work unrewarded under the present system if he has had material to work on.

A very striking evil caused by the present system is the entering for examination of students of average ability who come late to a secondary school with insufficient previous knowledge. Such students are often entered for the public written examination after one year's preparation. Even if they succeed in passing, they have so hurriedly and imperfectly assimilated what they have learnt, that in the higher classes they are completely out of their depth. The schools, owing to their weak financial position, have to try to secure as large a grant as possible, and are practically forced to send as many candidates as possible for the examination. If, however, there were a grant on inspection as well, the students of the type referred to above could be kept back for a year, till a good foundation had been secured, two years' work need not be done in one, and the schools would not lose financially by adopting sound educational methods.

The Board record with satisfaction that permission was obtained in 1913 to increase the number of inspectors from six to eight. The Act of 1913, making a portion of the school grant dependent on the results of inspection alone, made such an increase necessary.

III. The Prizes shall be awarded as follows :—that of £16 to the Boy whom, at the annual Examination in the Junior Grade among Male Candidates qualified in the manner expressed in the next preceding Rule, the Board shall adjudge to be the best answerer; One Prize of £10 to the Boy whom, in the same Grade at such Examination, the Board shall adjudge to be the next best answerer; and the other of £10 to the Girl whom, at such Examination in the same Grade, among Female Candidates in the manner aforesaid, the Board shall adjudge to be the best answerer.
